MaxxHaul 70210 Hitch Mount Bike Rack 4-Bike Rack, Black For Cars Trucks SUV's Mi...

£59.59

4.4★

The MaxxHaul 70210 is a straightforward hitch-mounted 4-bike rack, so the closest alternatives here are actually roof rack systems rather than direct hitch-rack rivals. That means they won't replace it for carrying four bikes on a tow bar, but they can be better for drivers who need flexibility, better rear access, or a setup that also works with roof boxes and other accessories.

Amazon Basics Cross Rail Roof Rack, 142 cm — £52.49, 4.6★ This is a strong value option if your car has raised side rails and you want a simple, well-rated roof bar setup. Compared with the MaxxHaul, it's not for bikes directly, but it opens the door to roof-mounted bike carriers, roof boxes, and cargo trays. It's better if you want a multi-use system and don't want to block the rear boot or tow bar. It's worse if you were specifically after a hitch rack that keeps bikes lower and easier to load. Choose this if you've got an SUV, estate, or van with raised rails and want a more versatile load-carrying solution.

Amazon Basics Cross Rail Roof Rack, 132 cm — £45.14, 4.6★ This is the cheaper sibling to the 142 cm version and makes sense for smaller vehicles or shorter roof spans. Against the MaxxHaul, it's again not a direct bike rack replacement, but it can be a smarter buy if your goal is to mount a roof bike carrier or carry a roof box. It's better on price and still carries the same solid rating, but worse if you need maximum width for larger vehicles. Pick this one if you want to keep costs down and your raised rails are within the stated fit range.

HandiWorld HRACK HandiRack Universal Car Roof Rack — £64.00, 4.4★ This is the most flexible option here because it's a soft, universal roof rack rather than a fixed metal bar system. Compared with the MaxxHaul, it's much more adaptable for different cars, which is handy if you change vehicles or don't have permanent roof rails. It's better for occasional use and quick fitting, but worse for long-term convenience, security, and heavy-duty everyday loads. It may also be less ideal in wet UK

weather if you're loading frequently. Choose this if you need a temporary, vehicle-agnostic solution and don't want to commit to permanent roof bars.

VEVOR Universal Roof Rack Cross Bars — £42.99, 4.4★ This is one of the cheapest hard roof-bar options and offers good value for raised side rails. Compared with the MaxxHaul, it's not a rear-mounted bike carrier, but it can support roof-mounted bike racks and other accessories. It's better if you want a low-cost entry into roof transport and like the added security of locks. It's worse than premium bars in brand reputation and may not feel as refined, but for the money it's compelling. Great for budget-conscious drivers with SUVs or vans.

VEVOR Roof Rack Cross Bars — £42.99, 4.4★ This appears to be a very similar VEVOR option, again aimed at raised side rails with a decent load rating. In practical terms, it competes with the Amazon Basics bars on price, but may appeal if you want a more budget-focused alternative with locks included. Compared with the MaxxHaul, the trade-off is the same: you're buying a roof-carrying platform rather than a hitch rack. It's better if you want a cheap base for roof bikes or luggage, and worse if you need easy boot access or lower loading height. Best for drivers building a roof-carrying setup on a tighter budget.

Overall, if you specifically need a 4-bike hitch rack, the MaxxHaul remains the most directly relevant choice. But if you're open to roof-mounted transport, the Amazon Basics bars are the safest all-round picks for quality and rating, while the VEVOR options are the best value.

Still Buy the Original If...

Buy the MaxxHaul 70210 if you already have a tow bar and want to carry up to four bikes at a lower loading height than a roof system. It's also the better choice if you need a simple, dedicated hitch rack rather than building a roof setup from scratch.
